

Project Engineer

COMPANY DESCRIPTION:

Perceptron, Inc. (NASDAQ: [PRCP](#)) Founded in 1981, Perceptron is an established technology company with a long history of innovation. Our global infrastructure, technological breadth, brand recognition within the industry, and—most of all—our people, set us apart from the competition.

Headquartered in Plymouth, Michigan, Perceptron has approximately 330 employees worldwide. Perceptron has team members in over a dozen countries with offices in the United States, Germany, France, Spain, Brazil, Japan, Singapore, China, Italy, Czech Republic and India.

Perceptron develops, produces, and sells non-contact measurement and inspection solutions for industrial and commercial applications. The products from the Company's Industrial Business Unit (IBU) provide solutions for manufacturing process control as well as sensor and software technologies for non-contact measurement and inspection applications. Automotive and manufacturing companies throughout the world rely on Perceptron's metrology solutions to help them manage their complex manufacturing processes to improve quality, shorten product launch times and reduce overall manufacturing costs. Perceptron also offers Value Added Services such as training and customer support services. Measurement solutions include inline and nearline dimension gauging, CMM, 3D scanning, robot guidance, gap & flush measurement and wheel alignment solutions.

Perceptron is committed to satisfying both the needs of its customers and the needs of its team members. Our continued leadership role in our industry is dependent on attracting and retaining world-class employees who understand that delighting the customer is our #1 job. Our collaborative culture is rooted in a set of core values shared by Perceptron team members around the world. We call these beliefs the Five Diamonds:

- **Innovation.** Our quest for innovation springs from the unrelenting belief that what we did yesterday will not be good enough tomorrow.
- **Commitment.** Our commitment to our customers' demands that we are bound to their goals and invested in their success.
- **Integrity.** We are steadfastly dedicated to a strict ethical code which guides our decisions and governs our efforts.
- **Value.** We provide value by creating unique solutions that maximize our customers' return on investment.
- **Excellence.** We ensure excellence by taking responsibility for the entire lifecycle of a solution. A single breakdown, anywhere along the way, compromises the quality of the end result.

We offer a casual, flexible work environment, with opportunities for training and excellent benefits. Additional information is available at www.perceptron.com.

POSITION DESCRIPTION:

As a Perceptron **Project Engineer**, you will work under the direction of a Project Manager to effectively install/support Perceptron projects (understand scope and tasks). You will also meet scheduling expectations and interact effectively with customers.

The **Project Engineer** will:

- Handle unexpected customer delays and situations during project installations appropriately, representing the Project Management Team in strong, positive manner.
- Determine and execute corrective actions for installation errors, customer changes, or unanticipated circumstances in coordination with your supervisor.
- Communicate project status to the Project Managers, and support Account teams, as necessary.
- Complete necessary training, so that you are able to complete the task in the field and ask for assistance from a Technical Specialist.
- Learn to integrate Perceptron technology with other equipment such as laser trackers, robots, and communication interfaces.
- Take initiative to broaden skillset across all Perceptron applications (Gauge/Guide), as opportunities arise.
- Represent Perceptron in a positive manner with all customers at all times.
- Provides records of installation work, delays, changes, for both customer and Perceptron.
- Knows how to access and use technical manuals and instruction guides.
- Able to guide other team members and customers using these documents.
- Completes assigned tasks in a timely manner, relentlessly driving toward successful project completion.
- Completes administrative requirements as required.
- Keep the project cost and time budget on the assigned level.

Candidate Requirements:

- Bachelor's Degree (Engineering, Math, Physics) or equivalent education and experience
- 1-2 years of experience with equipment or system installation technical projects involving concept, design, and build phases
- Ability to analyze data and recognize correlation trends and anomalies
- Ability to work as part of a team and work remotely in field
- Strong communication skills in technical environment
- Demonstrate strong customer service skills

OUR COMPREHENSIVE BENEFITS PACKAGE INCLUDES:

- Competitive Compensation
- Medical
- Dental
- Vision
- Life Insurance
- ST/LT Disability Insurance

- 401K with Company Match
- Employee Stock Purchase Plan
- Wellness Program
