

Project Engineer

COMPANY DESCRIPTION:

Perceptron, Inc. is an established technology company with a long history of innovation. Our global infrastructure, technological breadth, brand recognition within the industry, and—most of all—our people, set us apart from the competition.

Perceptron develops, produces, and sells non-contact measurement and inspection solutions for industrial and commercial applications. Automotive and manufacturing companies throughout the world rely on Perceptron's metrology solutions to help them manage their complex manufacturing processes to improve quality, shorten product launch times, reduce overall manufacturing costs, and ultimately improve productivity. Additional information is available at www.perceptron.com.

Perceptron was recently acquired by Atlas Copco and a part of Atlas Copco's newly created division Machine Vision Solutions within the Industrial Technique business area.

Atlas Copco, a company established in 1873, based in Stockholm, Sweden has customers in more than 180 countries and 39,000 employees. Through Perceptron's position in automated metrology and robot guidance solutions, together with the recent acquisition of ISRA VISION, Atlas Copco is creating a strong offering in machine vision solutions. The customers will receive an increased support in their transition towards smart manufacturing and flexible automation.

WHAT CAN YOU EXPECT FROM US?

- An inviting, family-like atmosphere
- Ample opportunities for professional development
- New challenges and opportunities to learn every day
- A culture known for respectful interaction, ethical behavior and integrity
- A rewarding, forward-thinking company culture with excellent company benefits
- Comprehensive benefits package including competitive compensation, medical, dental, vision, life insurance, ST/LT Disability Insurance, and a 401k with Company Match.

Passionate people create exceptional things. At Atlas Copco we believe in challenging the status quo, always looking for a better way. Our leading-edge technology enables us to innovate for the future. We believe that people make it happen and with us you are empowered to act. Your ideas can make a real difference and contribute to the quality of life for people everywhere.

POSITION DESCRIPTION:

As a Perceptron **Project Engineer**, you will work under direction of a Project Manager/Project Coordinator to effectively install/support Perceptron projects (understand scope and tasks).

The **Project Engineer** will:

- Meet scheduling expectations and interact effectively and respectfully with customers.
- Handle unexpected customer delays and situations during project installations appropriately, representing the Project Management Team in strong, positive manner.
- Determine and execute corrective actions for installation errors, customer changes, or unanticipated circumstances in coordination with your supervisor.
- Communicate project status to the Project Managers, and support Account teams, as necessary.
- Complete necessary training, so that you are able to complete the task in the field and ask for assistance from a Technical Specialist.
- Learn to integrate Perceptron technology with other equipment such as laser trackers, robots, and communication interfaces.
- Take initiative to broaden skillset across all Perceptron applications (Gauge/Guide), as opportunities arise.
- Represent Perceptron in a positive manner with all customers at all times.

Candidate Requirements:

- Bachelor's Degree (Engineering, Math, Physics) or equivalent education and experience.
- Ability to analyze data and recognize correlation trends and anomalies.
- Ability to work as part of a team and work remotely in field.
- Strong communication skills in technical environment.
- Demonstrate strong customer service skills.

TO APPLY: Send your resume to jobs@perceptron.com.

NO AGENCY REFERRALS ACCEPTED.
